Simplifying HR for the
Modern Workforce

ATLASSIAN ENTERPRISE STRATEGY & PLANNING Specialization

The challenge:

Disconnected Systems:
HR service management tools are not integrated with HRIS platforms, causing inefficiencies and duplicate work.

Scattered Requests:
Employees use email, SharePoint, chat, or paper forms, issues slip through the cracks.

Slow, Manual Processes:
On-boarding, payroll, and leave requests get delayed without automation.

Lack of Visibility:
Employees use email, SharePoint, chat, or paper forms, issues slip through the cracks.

Security & Compliance Risks:
Sensitive data shared over unsecured channels increases exposure.

Employee Dissatisfaction:
Frustrating processes lead to disengagement and higher turnover.

Our Solution:

HR Accelerator

Built on Atlassian Jira Service Management (JSM), the HR Accelerator empowers People & Culture teams to deliver seamless, people-first services fast, with preconfigured best-practice Employee Journeys that enable smooth, connected experiences across every stage of the employee lifecycle.

Frictionless Experiences
Centralise and digitise employee requests.

Help Center & Self-Service Portal
Employees get answers, anytime.

Automation & Workflows
Reduce manual effort with approvals, notifications, and tasks.

Seamless Integration
Connect with HR systems (Workday, HiBob, SuccessFactors), IT, Payroll, and Facilities.

The Value for Your Organisation

Not just process improvement, measurable outcomes that drive culture, efficiency, and growth.

Accelerated Service Delivery	Actionable Transparency	People Teams, Unburdened	Engaged Employees, Stronger Culture	One Platform, Many Services
Employees get what they need faster, reducing frustration and downtime.	Every request is visible and trackable, empowering both employees and leadership with real-time insights.	Automation removes repetitive tasks, freeing HR to focus on strategy and employee experience.	Frictionless services create trust, satisfaction, and higher retention.	HR, IT, and business functions unified in a single, scalable system, future-proofing your operations.
