

Atlassian Analytics Quick Start

This intensive half-day workshop is crafted to equip attendees with the expertise and insights required to harness Atlassian Analytics to its fullest potential. Whether you're a project manager, developer, IT specialist, or business analyst, this program offers an immersive exploration of leveraging Atlassian Analytics for comprehensive insights across project management, development cycles, IT service management, and beyond. Participants will master the art of crafting tailored analyses, visualizing data, and fostering seamless collaboration through Atlassian Analytics.

Key features:

- **Comprehensive Training:** This course equips participants with extensive expertise applicable across diverse domains such as project management, development cycles, and IT service management.
- **Practical Learning:** Through hands-on activities, attendees actively engage in creating and managing dashboards, ensuring they acquire practical skills ready for immediate application in real-world scenarios.
- **Tailored Insights:** Learn to customize dashboards and visualizations to precisely match their unique needs and objectives, enabling them to derive meaningful insights and make informed decisions aligned with their specific roles and projects.
- **Admin Proficiency:** In addition to user-focused skills, the course covers essential administrative tasks related to Atlassian Analytics, empowering participants with the knowledge and capabilities needed to efficiently manage users, data sources, and system performance within their organizations.
