

Governance Boot Camp

Maximize the value of your Atlassian investment in this 1-day class for admins and tool owners, whether optimizing an existing setup or launching a new one. Discover how to balance team autonomy with the benefits of standardized best practices and establish guardrails that ensure scalability and efficiency. Gain practical strategies for managing your Atlassian environment to achieve optimal performance and value.

Key features:

- **Holistic Governance Insights:** Explore a broad range of governance concepts, including strategic oversight, effective policy creation, and best practices to ensure robust management of Atlassian tools.
- **Tailored Framework Implementation:** Discover how to customize and deploy governance frameworks specific to Jira and Confluence, ensuring alignment with your organization's workflows and reporting needs.
- **Dynamic Policy Formation:** Learn to design and implement governance policies and structures that adapt to your organization's unique requirements, including the setup of governing bodies.
- **Strategic Vision Development:** Craft a cohesive vision and purpose for your governance strategy, focusing on aligning your governance goals with overall business objectives.
- **Interactive Application Sessions:** Participate in engaging, hands-on sessions in simulated environments, guided by Atlassian-certified instructors, to practice and refine your governance implementation skills.
