

Plans in Jira

Discover how to align your teams with enterprise goals in this half-day workshop tailored for managers. Participants will explore various methods for visualizing work, tracking dependencies, monitoring capacity, and applying different scenarios to enhance team alignment and performance.

Key features:

- **Customizable Planning Tools:** Learn how to interpret and tailor plans to fit your team's unique needs and goals.
- **Visual Management Techniques:** Gain hands-on experience with roadmap views, scope sections, and saved views to effectively visualize and manage work.
- **Dependency and Capacity Tracking:** Master the skills for managing issue hierarchies, tracking dependencies, and planning team capacity.
- **Scenario Planning and Auto Scheduling:** Explore methods for creating and applying scenarios and leveraging auto-scheduling for improved project forecasting.
- **Effective Communication and Sharing:** Develop techniques for exporting plans and sharing information with stakeholders to ensure alignment and transparency.

Class outline:
