

# SAFe® Product Owner/Product Manager - Certified SAFe® Product Owner/Product Manager

What skills do you need to deliver value in an Agile enterprise? The SAFe® Product Owner and SAFe® Product Manager (POPM) course covers the tactical responsibilities of these roles in the Agile Release Train (ART). The course and resulting certification give you the guidance and tools to work effectively in remote environments with distributed teams.

Learn how product owners and product managers should work together to achieve the best possible customer and business outcomes. The SAFe® POPM course will teach you how to adopt a customer-centric approach to building products, using the Scaled Agile Framework® to deliver more value, faster. Topics covered in this course include the daily role of POs and PMs; collaborating with engineering teams and business stakeholders; how to write epics, features, and stories; and how to design, prioritize, build, test, and deliver products with increased productivity and higher quality.

## Attendees learn:

- How to perform the role of a PO and a PM on a daily basis
- How to put the customer at the center of your design, build, and test process
- How to prepare for and lead PI Planning
- How to decompose Epics into Features and Feature into Stories
- How to collaborate with Agile teams to forecast work
