

SAFe® Release Train Engineer - Certified

SAFe® Release Train Engineer

Unique to SAFe®, the Release Train Engineer (RTE) is part of the trio of leaders, including product managers and system architects. This is critical in leading Agile Release Trains (ARTs) to deliver value. The RTE must create the right environment, have the right conversations, facilitate the right meetings, and gather the right people to make decisions based on the right data.

In the SAFe® RTE course, you'll learn to execute SAFe® and continuously improve PI Planning and other vital SAFe® events. You'll discover how to coach leaders, teams, and Scrum Masters in new processes and mindsets. And you'll get the guidance and tools you need to work effectively in remote environments with distributed teams.

Attendees learn:

- How to lead ARTs and large solutions in a SAFe® organization
- How to apply Lean-Agile knowledge and tools to release value
- How to foster relentless improvement
- How to build a high-performing ART by becoming a servant leader and coach
