

SAFe® for Teams - Certified SAFe® Practitioner

What does it mean to be part of an Agile team on an Agile Release Train (ART) that delivers value to customers? SAFe® for Teams covers the tactical skills to be a high-performing member of an ART. The course also gives you the guidance and tools to work effectively in remote environments with distributed teams. Get the most out of your learning experience by taking it into context with your team and other teams on your ART.

SAFe® for Teams will teach you all about your role on an Agile team and how your team works with others as part of an ART. You'll learn how to plan and execute work, how to apply Scaled Agile Framework® and Agile principles, and how to continuously improve. Taking the Scaled Agile Framework® for Teams with your team will empower all of you with the collective knowledge to collaborate effectively, do the best possible work, and hit the ground running before your next planning event.

Attendees learn:

- Your role on the team and your team's role on the ART
- How to apply SAFe® principles to scale Lean-Agile delivery
- How to plan and execute iterations and PIs
- How to continuously improve the ART
